

Geist Auto-Dialer

Expand to a new level of alert notification on your Geist Environmental Monitor + Relays (RSO) by adding the new relay controlled Geist Auto-Dialer. The Auto-Dialer is available in both PSTN (APD-T01) and GSM (APD-G05) versions for maximum flexibility. Battery back-up ensures that the Auto-Dialer can still deliver alerts even if its power source is lost.

Ideal for use as a back-up communication method to initiate alerts if the network is down and SNMP and email alerts cannot be issued.

APD-T01 - PSTN* Kit

PSTN slave unit
US 12V adaptor
5m alarm cable
US telephone cable
Fixing kit for drywall

9V battery required for
battery back-up
(not included)

* PSTN: Public Switched
Telephone Network

FEATURES
