ETHERNET METER (EM)

The Geist Ethernet Meter was designed as an up-time assurance solution for your critical IT equipment. Remote access, real-time monitoring of connected loads and user defined alarm thresholds result in an early warning system for potential circuit overloads. This advanced warnings solution protects against costly downtime.

CURRENT METER (CM-3)

The Geist CM-3 series scrolling 3 Circuit Current Meter provides True RMS current readings for each of the 3 breakers within the power strip. The CM-3 meter scrolls through each breaker reading to allow for easy load balancing within your power strip.
